

MFS App IOS Log In Page

MFS App IOS Home Page

MFS App IOS Add Picture

Click Arrow Back button will go back to App Home page

Camera Roll

Next

There is an black overlay translucent with draggable and scalable graphic on it indicate the picture on canvas is zoomable and can be moved around. But this black overlay translucent notice would be displayed for first time using only. Notice would disappear when user touch on it.

First picture in Camera Roll would be automatically loaded on frame. (Selected picture is dim with a sharp purple border surrounding it indicates it is selected)

Camera Roll is scrollable

There are 3 options to add a picture which are take picture, select from camera roll and add video. (The active option would be highlighted with purlish gradient color and having an upward arrow pointing to it while the rest non-active options go dim in color unless it was selected)

# MFS App IOS Add Comment

## Design #1

- Click Arrow Back button will go back to Home page
- Each comment would include a circle avatar, comment itself, username and time. (The font style and text arrangement will be the same as it's on Home page's Looks comment section)
- Comment section will be scrollable if there are a lot of comments on list

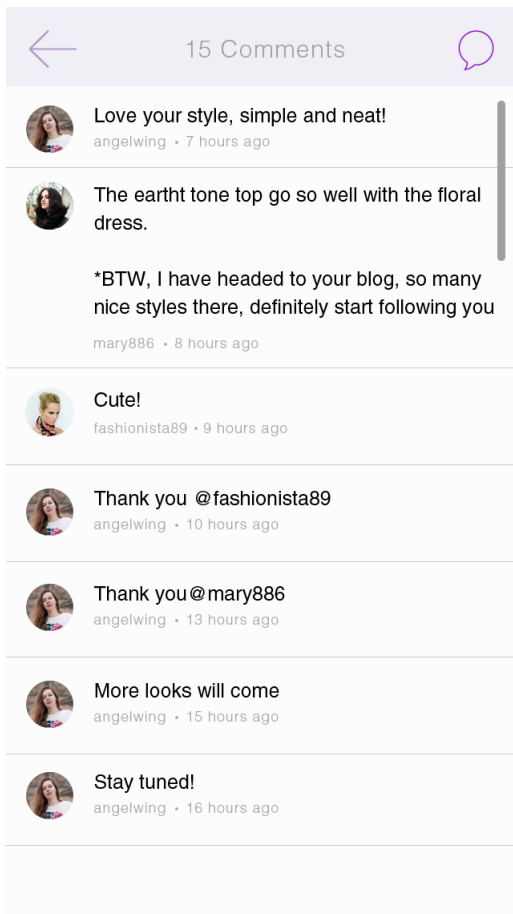

- Input comment field is at the bottom of the page with an eye-catching send comment button

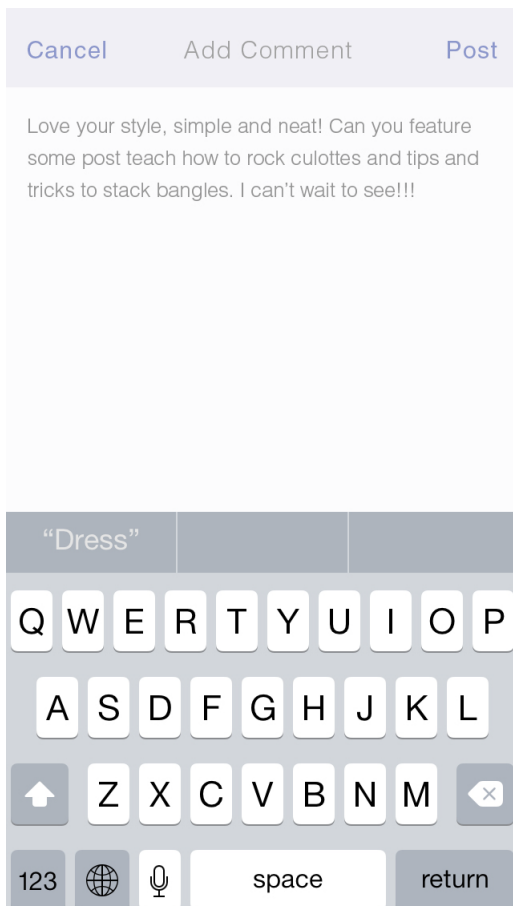

- When typing a new comment, keyboard will scroll and push the comment input field up

## MFS App IOS Add Comment

### Design #2

- The difference between this design and the previous design is that user need to click this top right comment icon to leave a new comment.

- After clicking on comment icon on previous page, it reaches Add Comment page.

Just type the new comment and click post will do

Or click Cancel to leave without input any comment

## MFS App IOS Follow page

● — The screen of Followers and Following is the same except the title

### Files

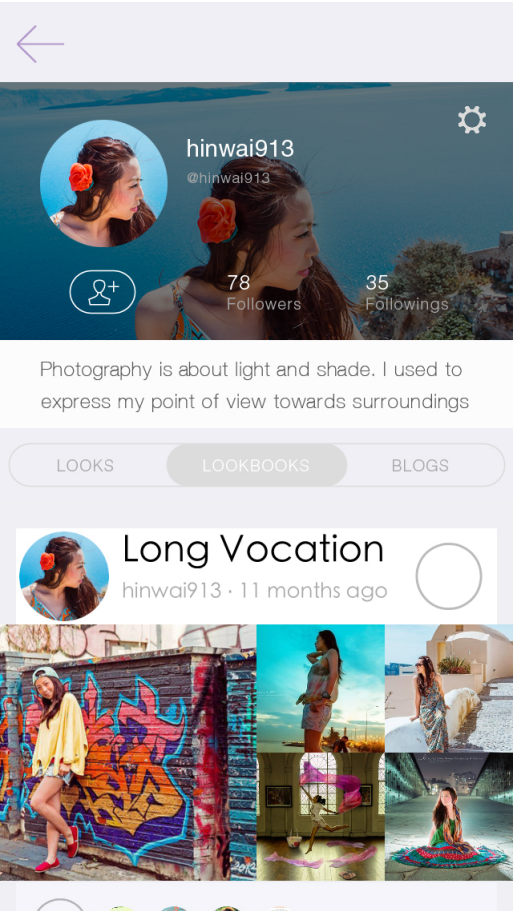

btnFollow.png  
(86px X 56px )

btnFollowing.png  
(86px X 56px )

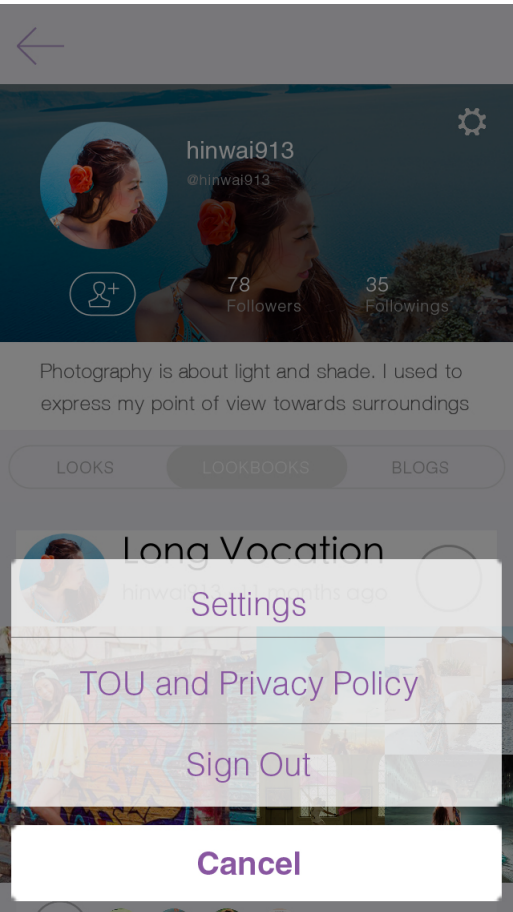

MFS App IOS Profile page

- The screen of Followers and Following is the same except the title
- Follow button, no. of followers and following are aligned at the bottom of profile banner
- About Me
- Switch menu for all 3 catagories of feed

The look of the button if it is already followed

- After clicking the top right gear button, scroll up options for Sign Out, Settings or TOU etc.
